SMART

SMART-TD CREW & OPERATOR SAFETY NOTICE

For generations, railroaders and transit workers stayed safe by looking out for one another.

When an injury or hazard occurred, it was posted where

crews could see it so the next shift did not walk into the same danger.

Today, carriers and transit agencies are delaying, hiding, or burying safety information in digital systems crews do not have time to access.

That puts workers at risk.

If the carrier will not post hazards in real time,

SMART-TD will.

LEGAL HELP FOR
INJURED RAILROADERS

This notice is to protect crews in real time.
Update it. Talk about it. Do not ignore it.

When hazards are visible, conversations start.
When conversations start, injuries drop.

This board exists so no member walks into the same hazard that injured a brother or sister the shift before. **THIS PROCESS IS NOT A SUBSTITUTE FOR REPORTING SAFETY ISSUES TO THE CARRIER. MEMBERS ARE STRONGLY ENCOURAGED TO REPORT CONCERNS DIRECTLY TO THE CARRIER AND TO USE THE QR CODES BELOW SO THAT UNION REPRESENTATIVES RECEIVE THE SAFETY CONCERN IN REAL TIME.**

HAZARD OR SAFETY ISSUE: _____

LOCATION (Yard, Route, Facility, Track, Area): _____

EQUIPMENT / CONDITIONS INVOLVED: _____

DATE FIRST IDENTIFIED: ____/____/____

STATUS (CIRCLE ONE): OPEN / UNDER
REVIEW / REPORTED / CORRECTED

DETAILS / WARNINGS FOR
CREWS: _____

Report a Worksite Issue

As a union member, when you see something unsafe or in violation of your collective bargaining agreement, report it to your business representative or local chairperson right away. Transportation Division members can fill out a safety report or a technology event/failure report through the SMART app, Member Portal or by email, text, visiting the local or a phone call. This lets your local leadership know when to step in.

Assault Reporting

The Assault Reporting Tool gives members a direct, documented way to report assaults or threats on the job so those incidents can't be dismissed or buried.

Technology Failure

SMART TD's Technology Report Tool lets members quickly document safety issues, equipment failures, and operational problems in real time so they can be tracked and acted on instead of ignored.

Hours of Service Form

The Hours of Service Tool allows members to easily log, verify, and report duty time and HOS violations so there's a clear record when the railroad oversteps legal limits.

National Safety Team

The National Safety and Legislative Team coordinates union-wide safety initiatives and fights at the state and federal level to protect members' rights, working conditions, and job security.

Safety Condition

To address the growing safety concerns of our membership, the union has implemented a universal Safety Condition Report that is now available on the SMART-TD website for all members to use.
